

## Pro 3 BEKT-S1501CBIII

The Pro3 is Barudan's newest single head machine. Featuring an open, bridge-style chassis, the Pro3's 15x17 inch sewing area provides more room for larger items, such as duffle bags, tote bags and jacket backs. The KT automat, with a color, touch screen display, offers improved visibility and increased memory. A new MK8 trimmer system has been introduced, along with a smaller diameter cylinder arm. The slimmer cylinder arm allows for sewing deeper into confined areas, such as shirt pockets. The Pro3 is the most versatile embroidery machine in the industry.

- **New** KT Automat with 8.4 inch LCD touch display is larger with user-friendly icons for easy operation.
- **New** tensioner system provides better and easier thread tensioning and improved thread break accuracy.
- **New** smaller diameter cylinder arm allows sewing deeper into confined areas and higher on caps.
- **New** MK8 trimmer system requires little or no adjustment.
- **New** high speed color change system for increased production.
- Barudan's exclusive positive needle drive system ensures quality embroidery on all types of garments, including thick karate belts and 3D foam on caps.
- Maximum speed on flats, 1300 stitches per minute; maximum speed on caps, 1000 stitches per minute.
