

Barudan Bluetooth® Manager

Since building the very first embroidery machine in 1959, Barudan continues to be the most trusted name in the industry. From the smallest home business to the largest decorated apparel company, investing in Barudan embroidery equipment ensures you will be producing the highest quality embroidery for many years to come.

To complement our equipment, Barudan now offers Bluetooth Manager for small businesses. In addition to eliminating USB flash drives, networking your embroidery machines with Bluetooth can optimize your workflow and minimize operator error. Bluetooth Manager utilizes a watched folder to drag and drop your designs and allows for the connectivity of up to 7 devices, including K-Series Barudan embroidery machines.

Bluetooth Manager works especially well with your digitizing software's Connection Manager. "Send" a design to the machine, and it will be downloaded automatically.
